Why don't you address the real issues before you destroy any more land and the way of life that we all came here to enjoy. The Elk Grove City Council and Chamber of Commerce is hell bent and determined to congest our freeways and pollute what little clean air we have. You need to address transportation problems before you unleash the developers and this insane idea of Lent Ranch. Millions of tons of concrete and asphalt will destroy the very essence of this wonderful community. There seems a total lack of foresight to what the future holds for our grandchildren. Where is the vision of the future??? Take a good look at Los Angeles County and see what they created. A monstrous city that is crime ridden and filthy beyond compare. Lent ranch is a bad idea. Don't give in to big money and private interest. Do what is right for our children. Preserve our community and way of life.

1

Moreover, the Elk Grove City Council is staffed by special interest and developer money. While we are choking in filthy summer air, the developers and their cronies will be enjoying a relaxing vacation on some far off island spending their millions at the expense of us little people. Don't let that happen. Stand up and say No...

Larry Gonzi
